

Pneumatic butterfly valve Ã~100 single acting actuator

Product codes:

Reference:
PC221-00011
EAN13: -
UPC: -

Product attributes:

Product description:

Our selection of butterfly valves with single-acting actuators includes the most common models found on refuelling vehicles. Application: Butterfly valves with single-acting actuators are generally used for safety systems related to fluid flow: fill limiter, dead man's device, etc. Advantages: They have the advantage of being perfectly waterproof thanks to their very high quality elastomer sleeve, which also seals the flanges without any additional seals. Contact us for more information or if you can't find the right product for you. Fluid flow cross-section: 100mm (4") Pressure resistance: 10 bar Maximum temperature: 60°C
