Product description:

Our selection of ball valves with single-acting actuators includes the most common models found on refuelling vehicles. Application: Ball valves with single-acting actuators are generally used for safety systems related to fluid flow: filling limiter, dead man's device, etc. Advantages: Ball valves have the advantage of being perfectly sealed at high pressure and in the long term, while avoiding pressure drops. Contact us for more information or if you can't find the right product for you. Fluid flow cross-section: 100mm (4") Pressure resistance: 20 bar Maximum temperature: 60°C
