Product description:

Diaphragm pressure regulator NL2-RGS 1/8" Gas with manometer supplied for flow rates up to 1500l / min. Adjustment of the pressure from 0.5 bar to 10 bar. The role of the pressure regulator is to transform a variable supply pressure into a fixed output pressure, whatever the pressure variations caused by hydraulic conditions, field accidents, pumping techniques, etc. Technical characteristics : - Fluid: compressed air and neutral gases - Orifice: 1/4 " Gas - Flow rate: 1,500 l / min - Adjustment range: 0.5 to 10 bar - Pressure gauge: Supplied unmounted - Battery mounting possible - Pressure supply: Simple, unilateral - Min / max operating pressure: 0.5 / 16 bar - Min / Max fluid temperature: -10 ° C to + 60 ° C - Ambient temperatures: -10 ° C to + 60 ° C - Die-cast zinc housing - Mounting position: Indifferent This air regulator can be mounted as a battery.
